

Intel® NUC

Discrete, Reliable Digital Surveillance

A Local or Remote Digital Video Security System in 4 Inches Square

The Shape That Fits the Future.

Intel® NUC

Discrete, Reliable Digital Surveillance

YOUR VIDEO SURVEILLANCE SOLUTION

Whether you need a perimeter video surveillance system or an on-premise solution, the Intel® NUC with 5th Generation Intel® Core™ processors delivers a powerful solution in a pint-sized package. With the optional remote management capabilities of Intel® vPro™ technology, you can view video footage and control cameras from any location. And the 4K display capabilities of Intel® HD graphics 5500 shows you vibrant Ultra HD images. With space for an M.2 SSD or a 2.5" HDD with RAID support, you have room to store files locally and the assurance of knowing your content is safe even if a drive fails.

VISUALLY STUNNING GRAPHICS

Intel HD Graphics 5500 with 4K display capability provides a seamless visual experience that requires no add-in card for Ultra HD video playback and increased speed and performance you want in surveillance systems.

ROOM TO CHOOSE

You can install both a lightning fast M.2 SSD or a 2.5" HDD with up to 2 TB for storing video files locally. And with RAID support, content is secure and can be viewed even if one drive malfunctions.

5TH GENERATION INTEL® CORE™ PROCESSORS

With the Intel Core vPro processor-based system, remote management and KVM capability, you can view footage and directly control your surveillance system from any system, anywhere.

TRIPLE DISPLAY

SEE THAT?

Two Mini DisplayPorts* provide support for triple display capability and let you view images on multiple screens.

RELIABILITY BUILT IN

A Watchdog Timer automatically resets the system if anomalies occur, so your surveillance system stays up and running.

WORLDWIDE POWER

Full 65W, wall mounted, multi country support power adapter for installations around the world.
